Myelinator™/Home Edition is limited to four (4) users and targets serious individual golfers who already own a Trackman or FlightScope launch monitor and want to change their swing based on the ball and club head metrics. The Myelinator™/Academy Edition addresses the needs of golf teaching professionals storing up to 1000 student swings and generates training revenue for the golf professional without being present. "The Myelinator™ has blown me away," declared Matt Walter, Own My Swing Performance Coach and Director of Player Development at Westhaven Golf Club in Nashville, TN who was certified last month at the Own My Swing Academy in Carlsbad, California. According to Walter, who was also Tennessee PGA Section Youth Player Development Award Winner in 2014, "The 'Practice Made Perfect' Myelinator™ has the ability to provide positive and negative feedback to the player and allow for self discovery to actually 'own your swing'. It dramatically cuts down the amount of time it takes for improvement and provides the instructor the reassurance that their pupils are practicing perfectly!" ([ownmyswing.com/Myelinator.php](http://www.ownmyswing.com/Myelinator.php) (<http://www.ownmyswing.com/Myelinator.php>))

The Myelinator™ consists of proprietary Myelinator Academy Performance Software (MAPS) running on a high speed Windows 10 processor driving high speed graphics being displayed on a 23" HD touch screen monitor. Two (2) powerful 3D sensors are attached, one to the body the other to the club. A customized ideal swing based on body type is then loaded into memory with the swing path being defined by metrics addressing thirteen (13) positions in three dimensional space for both the club head and body. These become the metrics for the golfer's unique swing. Practice consists of only fifteen (15) minutes day - and no golf balls to hit! The Myelinator™ is truly the game changing technology for serious golfers to literally 'own their swing'.
